

Tech Trek Counselors for Spring 2023

What is Tech Trek?

Tech Trek is a weeklong residential science, technology, engineering and mathematics (STEM) summer camp for rising eight-grade girls. Through Tech Trek, girls are immersed in a world that empowers and encourages them to think about themselves as future scientists, engineers, mathematicians, and computer specialists.

What are the roles of a Tech Trek counselor?

Tech Trek Counselors play a vital role in developing a positive, safe, and enriching experience for every participant. Counselors will direct activities for a small group of campers, promote team-bonding and mentoring, be on the lookout for potentially harmful behaviors and situations, provide clear and concise information regarding camp activities and the camp schedule, and accompany the campers to all activities both on and off the UAH campus. Campers receive the bulk of their information about activities, rules, conduct, and social skills from their Counselors.

Am I eligible to be a Tech Trek Counselor?

- Counselors must be female and have completed at least one year of college.
- Counselors will live on campus for the week of Tech Trek (June 11-17, 2023) and for training on June 10th and be present for all camp activities.
- Counselors must submit to and pass a background check.

How can I learn more?
